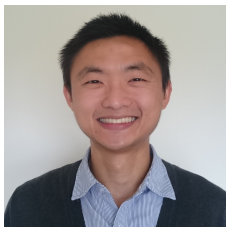
# Spencer Teng



Versatile data scientist with multi-year hand-on experience building AI-powered applications such as recommendation, medical image analysis, and chatbot. Goal-oriented, autonomous, and strong problem-solving engineer.

## Skills

Python, Machine Learning, Deep learning, Keras, TensorFlow, Scikit-learn, Pandas, Plotly, Django REST, Git, Docker, Linux/Unix, Scrum

## Experience

**Oct 2022 – Present** **Machine Learning Engineer**
*Pandora, CPH, Denmark*
Machine Learning Engineer at MLOps.

- Lead and implement the ML cycle standardization towards scalable data products.

**Oct 2018 – Sep 2021** **Machine Learning Engineer**
*Data Science Lab, Nordea Bank, CPH, Denmark*
Developed Innova, Nordea in-house chatbot using Natural Language Processing techniques.

- Developed chatbot REST APIs to answer customer questions and perform banking actions..
- Automated machine learning retraining and deployment in production.
- Introduced model inference optimization to reduce ML API latency by 30%.

**Aug 2017 – Jun 2018** **Technical Co-founder**
*GUTXY, Frederiksberg, Denmark*

- Developed a bioinformatics product that provides a report to improve customers' gut health.
- InnoFounder incubator program in 2018 (acceptance rate: 13/102).

**Mar 2017 – Sep 2021** **Machine Learning Engineer Freelancer**
*Upwork*
Top-rated freelancer specialized in deep learning and computer vision systems.

- Design and implement production-grade REST APIs for object detection, image segmentation, etc.

**Feb 2016 – Feb 2017** **Research Assistant**
*Biomediq, CPH, Denmark*

- Published a book chapter about deep neural net for brain MRI segmentation and analysis.

**Aug 2011 – Aug 2014** **Research Assistant**
*Music AI Lab, Academic Sinica, Taipei, Taiwan*

- Developed context-aware music recommendation app from data collection to prototyping for HTC.
- Published papers in conference and journal about recommendation and user behavior analysis.

## Education

**2014-2016** M.Sc. Computer Science - University of Copenhagen
Master Thesis: Automated brain MRI segmentation with deep neural networks.
